Samiksha Sahu - Software Engineer

Pune, Maharashtra | 99758599906 | samikshasanjaysahu@gmail.com | linkedin.com/in/samikshasahu20 | github.com/SamikshaSahu20 |samikshasahu20.github.io/Portfolio_web

PROFILE SUMMARY

Software Engineer with 1+ year of industry experience in backend development, data engineering, and automation. Experienced in building Python-based ETL pipelines, AWS serverless workflows, and AI-powered tools, with additional exposure to Master Data Management (MDM), Snowflake, and Azure. Skilled in enterprise data integration, application development, and building scalable solutions for global teams.

EDUCATION

B.Tech, Computer Science and Engineering – Vishwakarma University, Pune

2025 – 2026

- Relevant Coursework: Business Intelligence, Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
- Academic Achievement: 8.73 CGPA

SKILLS

- **Technical Skills:** Python, SQL, Java, REST APIs, Node.js, GraphQL, ETL Pipelines, Data Integration, n8n
- **Tools & Technologies:** AWS (Lambda, S3), Databricks, Snowflake, Microsoft Azure, Fivetran, Palantir Foundry, GitHub, Jira, Portkey, Power BI, Amazon QuickSight, Excel
- **Core Skills:** Analytical Thinking, Problem Solving, Communication, Stakeholder Management, Team Collaboration

INTERNSHIP EXPERIENCE

Data Engineering Apprentice – Eaton Technologies Pvt. Ltd.

August 2026 – September 2026 | EITC Department

- Gained exposure to Master Data Management (MDM) activities involving data integration, transformation, hierarchy management, and enterprise data quality.
- Worked with MDM - related technologies and tools, including Python, SQL, Snowflake, Microsoft Azure, Reltio and Palantir Foundry.

Software Engineer Intern - Syngenta

July 2025 – June 2026

- Developed automated ETL pipelines using Python to extract, transform, and integrate data from 10+ enterprise platforms, reducing manual data handling efforts by 70%.
- Built scalable server-less data workflows using AWS Lambda and AWS S3, enabling automated processing of 10,000+ records daily and improving pipeline efficiency by 40%.
- Automated data collection and transformation across multiple enterprise platforms, improving data availability and streamlining reporting workflows for global teams.
- Identified key performance metrics and trends through data analysis, enabling leadership teams to make data-driven decisions, improve operational visibility, and prioritize process optimization initiatives.

ACADEMIC PROJECTS

Jira AutoCoder – AI-Powered Code Generation and Automation

C2 General

- Developed an AI-powered tool to generate code and comments from Jira ticket descriptions, streamlining software development workflows.
- Tools/Skills Used: Python, AI-powered Automation, Jira Integration, Web Development, Prompt Engineering.
- Outcome/Learning: Built a functional web application to execute generated code, monitor execution, validate outputs, and refine code through iterative prompting.

YOLOPath – Intelligent Road Hazard Detection & Navigation System

- Engineered a real-time road hazard detection system to identify potholes and support safer route recommendations.
- Tools/Skills Used: Python, YOLO, Google Maps API, Machine Learning, Data Processing.
- Integrated computer vision and mapping services to improve route awareness and generate actionable road-condition insights.

CERTIFICATIONS

- Data Ingestion with Lakeflow Connect – Databricks
- Build Data Pipelines with Lakeflow Spark Declarative Pipelines – Databricks
- Meta Back-End Developer Professional Certificate
- IBM AI Fundamentals – IBM SkillsBuild

EXTRACURRICULAR ACTIVITIES

- Participated in **Smart India Hackathon (SIH 26)**, collaborating with a multidisciplinary team to develop innovative solutions for real-world problem statements.
- Secured **Runner-Up position in VU Tech Fest 2024**, demonstrating technical innovation, teamwork, and problem-solving skills through project-based competition.
- Attended **technical workshops, webinars, and industry events** focused on Artificial Intelligence, Cloud Technologies, Software Development and Emerging Technologies.
